

OPENCODE

# Cat Blog

Source: README.md

A full-stack cat blog website built with Next.js, TypeScript, Prisma, and Tailwind CSS. Features include blog posts, photo galleries, user authentication, and a “Cat of the Day” feature.

## 🌟 Features

### 🌟 Core Features

- **Blog System:** Create, read, update, and delete blog posts with categories and tags
- **User Authentication:** Secure login/signup system with role-based access (User/Admin)
- **Admin Dashboard:** Complete admin interface for managing content
- **Commenting System:** Nested comments with moderation capabilities
- **Photo Gallery:** Upload and browse cat photos with albums
- **Cat of the Day:** Daily featured cats with voting system

### 🎨 Design & UX

- **Responsive Design:** Works seamlessly on desktop, tablet, and mobile
- **Modern UI:** Clean, cat-themed design with orange color scheme
- **Interactive Elements:** Hover effects, smooth transitions, and micro-interactions
- **SEO Optimized:** Meta tags, structured data, and semantic HTML

### 🔧 Technical Features

- **TypeScript:** Full type safety throughout the application
- **Database:** SQLite with Prisma ORM (easily switchable to PostgreSQL)
- **Authentication:** NextAuth.js with credential-based login
- **File Upload:** Image upload with validation and optimization
- **API Routes:** RESTful API for all features

## 🚀 Getting Started

### Prerequisites

- Node.js 18+

- npm or yarn

## Installation

### 1. Clone and setup

```
git clone <your-repo-url>
cd cat-blog
npm install
```

BASH

### 2. Environment setup

```
cp .env.example .env
# Edit .env with your configuration
```

BASH

### 3. Database setup

```
npx prisma migrate dev
npx prisma generate
```

BASH

### 4. Run development server

```
npm run dev
```

BASH

5. **Visit app** Open <http://localhost:3000> in your browser

## ■ Project Structure

```
cat-blog/
├── src/app/                # Next.js App Router
│   ├── (auth)/            # Authentication pages (signin, signup)
│   ├── (admin)/          # Admin dashboard
│   ├── api/               # API routes
│   ├── blog/              # Blog pages
│   ├── gallery/           # Photo gallery
│   ├── cat-of-the-day/    # Cat of the Day feature
│   ├── components/        # Reusable React components
│   ├── ui/                # UI components (Button, etc.)
│   ├── lib/               # Utilities and configurations
│   └── types/              # TypeScript type definitions
├── prisma/                # Database schema and migrations
├── public/                 # Static assets
└── uploads/                # User-uploaded files
```

## ■ 🗄 Database Schema

---

The application uses a comprehensive database schema with the following models:

- **Users:** Authentication and user profiles
- **Posts:** Blog posts with rich content
- **Categories & Tags:** Content organization
- **Comments:** Nested commenting system
- **Gallery Images:** Photo management
- **Albums:** Photo collections
- **Cat of the Day:** Daily featured cats
- **Votes:** Voting system
- **Subscribers:** Newsletter subscriptions

## ■ 🔒 Authentication

---

Uses NextAuth.js for secure authentication:

- Credential-based login (email/password)
- Role-based access control (USER/ADMIN)
- Protected routes and API endpoints
- Session management

## ■ 🖼 Gallery Features

---

- **Image Upload:** Secure file upload with validation
- **Image Optimization:** Automatic thumbnail generation
- **Albums:** Organize photos into collections
- **EXIF Data:** Store and display photo metadata
- **Likes System:** User engagement with photos

## ■ 🐱 Cat of the Day

---

- **Daily Selection:** New featured cat each day
- **Voting System:** Users can vote for favorites
- **Archive:** Browse previous featured cats
- **Submission Form:** Easy cat submission process

## ■ 🛠️ Development

---

### Available Scripts

BASH

```
npm run dev          # Start development server
npm run build         # Build for production
npm run start        # Start production server
npm run lint         # Run ESLint
npm run type-check   # Run TypeScript type checking
```

### Database Management

BASH

```
npx prisma studio    # Open database GUI
npx prisma migrate dev # Run database migrations
npx prisma generate   # Generate Prisma client
```

## ■ 🌟 Key Features Implementation

---

### Admin Dashboard

- Content management (posts, categories, users)
- Analytics and statistics
- Comment moderation
- Media library management

### Blog System

- Rich text editing capabilities
- SEO-friendly URLs
- Category and tag organization
- Draft/published states

### User Experience

- Responsive mobile-first design
- Smooth animations and transitions
- Loading states and error handling
- Search and filtering capabilities

## ■ 📱 Responsive Design

---

The application is fully responsive with breakpoints for:

- Mobile: < 768px
- Tablet: 768px - 1024px
- Desktop: > 1024px

## 🚀 Deployment

---

The application is ready for deployment on:

- **Vercel** (recommended)
- **Netlify**
- **AWS Amplify**
- **Any platform supporting Next.js**

## Environment Variables for Production

```
DATABASE_URL=           # Production database URL
NEXTAUTH_URL=           # Your production URL
NEXTAUTH_SECRET=        # Secret key for NextAuth
```

## 🎯 Future Enhancements

---

- Social media integration
- Email notifications
- Advanced search functionality
- Dark mode support
- Real-time comments
- Image AI tagging
- Mobile app companion

## ✍️ Contributing

---

1. Fork the repository
2. Create a feature branch
3. Make your changes
4. Add tests if applicable
5. Submit a pull request
