

CLAUDE CODE DEEP DIVE

Expense Tracker

Source: README.md

This is the starter project used in my [Claude Code course](#).

A basic expense tracker app built with React. It intentionally has a bug, poor UI, and messy code — all of which we fix together throughout the course.

■ Getting Started

```
npm install  
npm run dev
```

BASH

Then open your browser at `http://localhost:5173`.
